## HeelZup™ Interface Pressure Mapping

Heels UP ( Standard Model)  
 Pressure Test  
 Male 63 yrs. 6' 200 lbs

Heelzup Standard Model  
 Male 62 yrs 6'2" 260 lbs

The interface pressures for HeelZup™ were measured using the Vista Medical Force Sensitive Applications, (FSA), System. The pressures average 19 mmHg across the backs of the calves and there are no peak pressures at the Popliteal or the Achilles areas. The low pressure on the calves is due to the pressure reducing grade of foam used in the HeelZup™ design.
